

# ABSTRACT

Amine and amide derivatives of the formula:

5

**A**

10 which are ligands for the neuropeptide Y<sub>5</sub> (NPY<sub>5</sub>) receptor, methods of preparation and pharmaceutical compositions containing amines and amides of formula **A** as the active ingredient are described. The amines and amides of formula **A** are useful in the treatment of disorders and diseases associated with NPY receptor subtype Y<sub>5</sub>.
